EVMNS

EOS-EVM Name Service

Non-Affiliated Project 

Pomelo Grant URL pomelo.io/grants/evmns

EVMNS (EVM Name Service) is a decentralized domain naming system built on EOSEVM. It uses .evm domains to associate human-readable names with various content, like addresses and URLs. EVMNS aims to connect people, information, assets, and dApps in the WEB3 world, improving accessibility and usability of the blockchain.

Project Information

Grant Owner	Harry Davis
Treasury	evmnsdomains
Website	evmns.space
Github	github.com/evmns/EVMNS
White Paper	docs.evmns.space

Contact & Social

Email	evmns.space@gmail.com

Telegram	t.me/EVMNSspace (37 members)
Discord	N/A

Previous Status

- Approved for ENF Grant Level 3
- Design specifications updated on GitHub
- They wrote that the development of the smart contract and invitation incentive system was completed. but code is not open source yet.
-

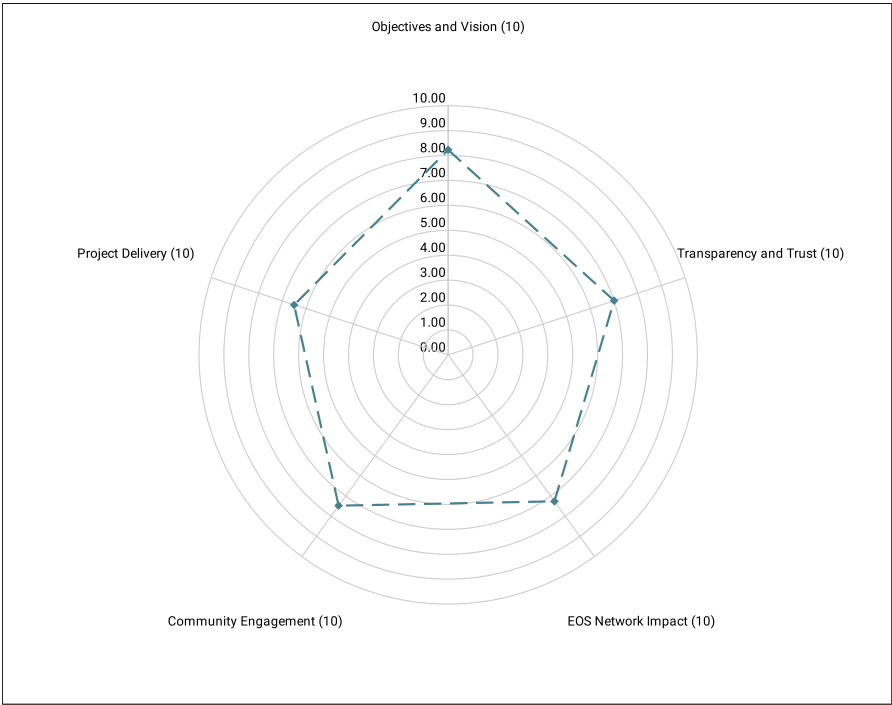

Current Status

- Logo for the project has been selected using community participation.
- They wrote they are currently conducting multiple rounds of debugging and testing, expect to release it online soon.
- Project is in alpha test now as per owner.
-

Grants Issue found

- According to the roadmap on the EVMNS website, they have missed several milestones. Deployment test network in June (or maybe this was done, but we can't verify), audit and deployment mainnet in July 2023.

Most Matching Funds #3

Metahub

Metahub - Web Plugin Wallet

Non-Affiliated Project 

Pomelo Grant URL pomelo.io/grants/metahub

Metahub is a powerful web plugin wallet developed for EOS and EOS side chains. The new version of the wallet will support as well the EOS EVM, allowing EOS users to manage EOS native and EOS EVM in one wallet.

Project Information

Grant Owner	Dasheng
Treasury	metahubraise
Website	metahub.cash/
Github	github.com/metahubwallet/metahub-core
White Paper	docs.infinitydao.fi/incubation-development/metahub-w

Contact & Social

Email	N/A
Twitter	@MetahubWallet (10 followers)
Telegram	t.me/MetaHub_Community (13 members)
Discord	N/A

Previous Status

- The wallet supports multiple side chains, including custom chains like EOS and WAX, with the added feature of an application whitelist.
- The unique CPU smooth mode eliminates the need for users to worry about CPU and NET, making the experience hassle-free.
- The code is open source.

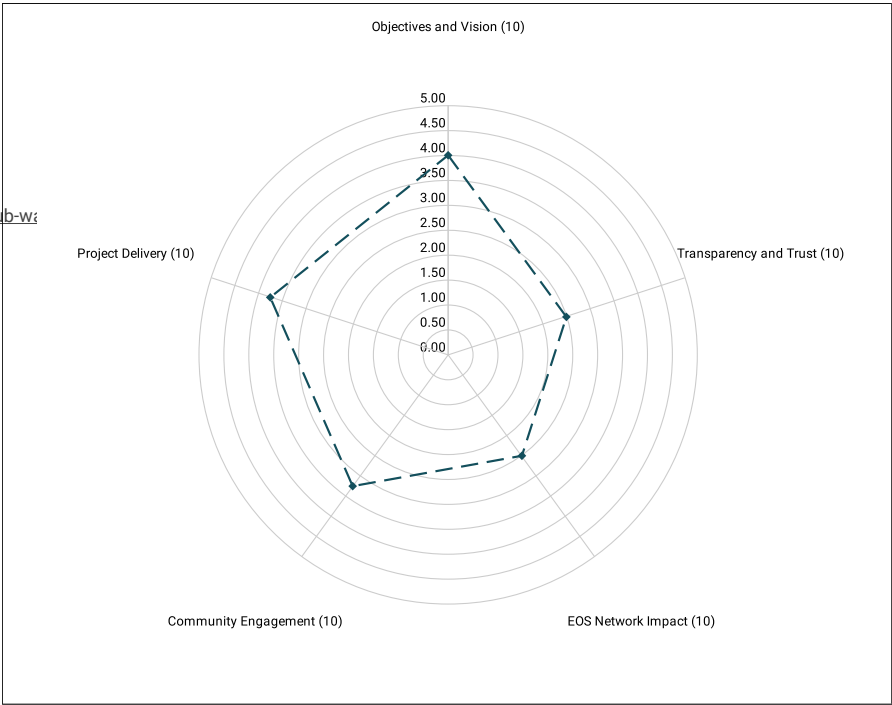

Current Status

- On Pomelo Metahub wrote that more secure import and export features were delivered and that they used Chrome mainfest v3 and Vue3+Vite and re-wrote the wallet and open sourced it.
- The Metahub team wrote that they are working on it, that 1) EOS users can seamlessly access both EOS EVM and EOS native applications without the need to switch wallets, enabling easy integration and interaction between the
- 2) users can import ETH addresses and seamlessly use EOS wallets with ETH addresses on BSC and OEC (OKX exchange chain).
- 3) to facilitate ETH address transfers and automatically activate the address with sending \$EOS if needed.

Grants Issue found

- The wrong EOS logo is representing the EOS Community.

Hyperion History API

Hyperion History API - Maintenance and Operation

Non-Affiliated Project

Pomelo Grant URLpomelo.io/grants/hyperion

History APIs on the blockchain enable real-time indexing and structuring of data for searchability. However, the challenges of throughput and block times make it difficult to efficiently serve historical information on AntelopeIO/EOSIO. Nonetheless, their availability is vital for attracting and retaining projects within the AntelopeIO/EOSIO ecosystem.

Project Information

Grant Owner	Gabriel Jardim (Igor)
Treasury	eosriobrazil
Website	https://hyperion.docs.eosrio.io/
Github	https://github.com/eosrio/hyperion-history-api
White Paper	N/A

Contact & Social

Email	N/A
Twitter	@rioblocks (2.039 followers)
Telegram	t.me/EOSHyperion (381 members)
Discord	N/A

Previous Status

- EOS Rio presently assumes the operation and maintenance of the system, guaranteeing its continuous delivery of precise and searchable blockchain data.
- Within the Antelope ecosystem, Hyperion, developed by EOS Rio, stands as one of the most widely utilized History API solutions.
- In the latest funding season, the allocation of funds enabled the acquisition of the new Intel 13900k and AMD 7950x, both of which are now fully operational.
- Furthermore, supplementary RAM was procured for server assembly, enhancing the infrastructure's scalability on EOS and Antelope Chains.

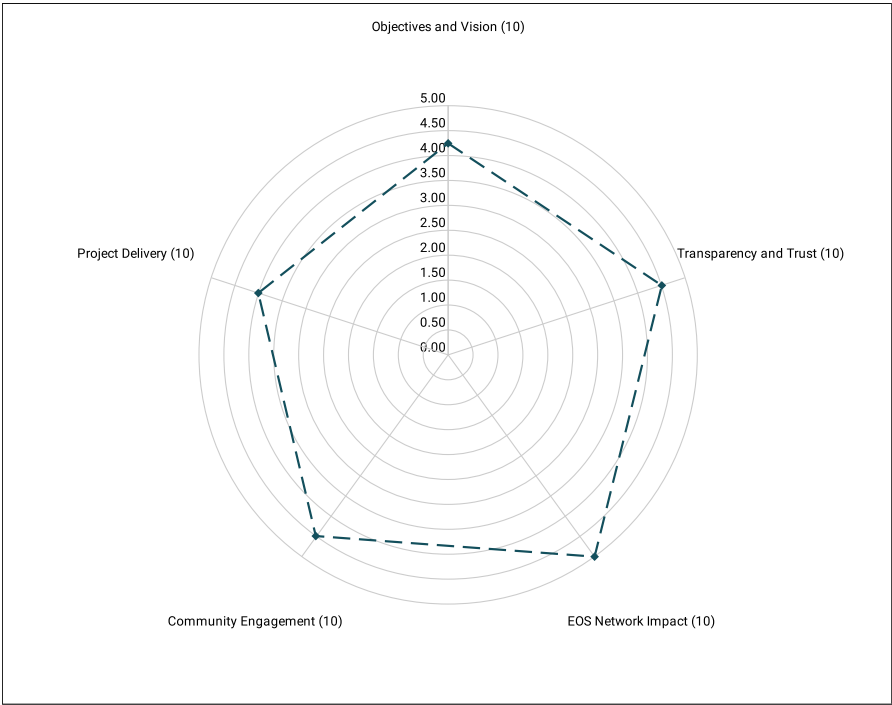

Current Status

- Primary responsibilities encompass software maintenance and providing unwavering support to the developer community through https://t.me/EOSHyperion
- The Hyperion Hub and its accompanying SDK for automated endpoint selection are currently in the final stages of development, with an anticipated launch scheduled for Q3/2023.
- Dedicated substantial resources to develop a validation tool for providers that autonomously detects inconsistencies in the History data and rectifies them to ensure utmost accuracy and completeness of information.

Social Recovery in the Recover+ Portal

Recover + project related emergency reaction platform

EOS Support Affiliated 

Pomelo Grant URL pomelo.io/grants/socialrecover

Recover+ (R+) is a cyber-security portal and rapid incident response program for EOS DeFi projects. It offers a formalized process for recovering stolen funds in the event of a hack. This allows project developers on EOS to opt-in and gain access to valuable tools and information, and BPs to take action quickly and confidently to recover compromised funds.

Community Wish #2

LikeEOS Russian EOS Community

Community for Russian EOS Users

Non-Affiliated Project

Pomelo Grant URLpomelo.io/grants/likeeosrussi

Inform the Russian EOS community about the EOS ecosystem, fight FUD, help newcomers, and attract new members.

Project Information

Grant Owner	Cryptozhenek
Treasury	likeeosdonat
Website	likeeos.ru
Github	N/A
White Paper	N/A

Contact & Social

Email	N/A
Twitter	@likeeosru (265 Followers)
Telegram	t.me/LikeEOS (302 Members)
Discord	N/A

Previous Status

- Translated EOS news into Russian and delivered it to Telegram and YouTube channels.
- After launching the website, Uploaded articles, news, and videos about EOS.
- Preparing for a YouTube show with EOS Synergy and EOS Support.
-

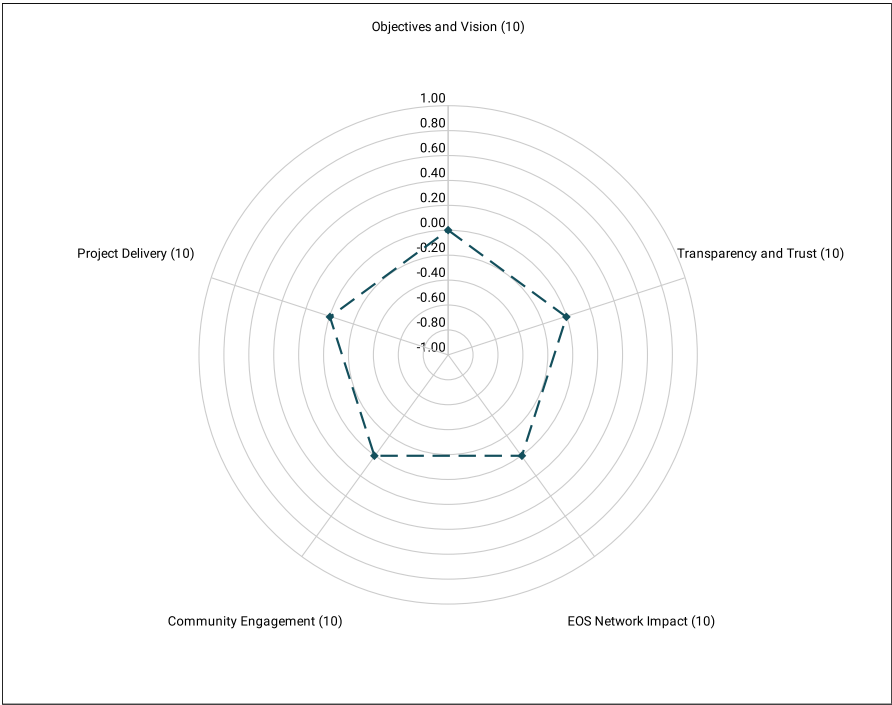

Current Status

- Continue to translate EOS News into Russian and provide it on website, Twitter, and Telegram.
-
-

Rating Card

Category	Rating Program
Objectives and Vision (10)	Innovation Does the project bring a new or original idea not previously available on the EOS Network?
	Feasibility Is the project's objective and Roadmap for achieving their final goals identified?
Transparency and Trust (10)	Team Transparency Can access to Team information, contact details, websites, GitHub, social media, of project team members be obtained without restrictions?
	Progress Tracking Does the project periodically communicate reports and milestones on public channels and other social media platforms?
EOS Network Impact (10)	Community Infrastructure Does the project promote forming a self-governing community where people who share a common vision can come together and collaborate?
	Collaboration and Synergy Does the project engage in strategic partnerships and alliances with other organizations, communities, or chains? (Hard No for new projects)
Community Engagement (10)	Open Channel Establishment Are there accessible official channels where people can freely gather to discuss and provide feedback for the project?
	Proactive Outreach Are specific mechanisms in place to encourage and facilitate meaningful participation, feedback, and opinions through regular meetings, workshops, surveys, or AMA sessions?
Project Delivery (10)	Deliverables Has the project produced clear deliverables per Roadmap? (Hard No for new projects)
	Accountability of Results Is there described plans to ensure the responsibility of acquired funds when the project can not achieve its goals?
